## ICE STORAGE CAPACITY

The calculation used to determine actual ice storage capacity varies among manufacturers, most use the AHRI standard. When the AHRI standard is not referenced, use cubic meters capacity for accurate comparison between manufacturer's models.

NOTE: Manitowoc remote systems are only approved and warranted as a complete new package. Replacing an ice machine with an Indigo remote model requires a NEW condenser and line set. Only Manitowoc CVD condensing units are approved with QQ and IB Series machines.

¹Appropriate adapter is required with ice dispensers or storage bin. For Quiet Qube machines other than IB machines, an optional K00477 bin dispenser thermostat kit maybe required for high humidity locations to reduce equipment sweating. IB ice machines come equipped from the factory with a built in bin dispenser thermostat.

# About Manitowoc Ice Machines

**AHRI Certified-** Manitowoc Ice Machines and D-Bins are certified by The American Heating and Refrigeration Institute. (AHRI) This means the data we published is validated to be true based on ASHRAE standards. Our certified products are continually tested by an independent third party laboratory to validate our products perform to the ratings or specifications published. Rest assured, products that carry the AHRI label comply to their publish specification. (AHRI rates ice machine performance is rated at the 90 ambient temperature and 70 water temperature. Bin capacity rating is measured by the cubic volume of the interior of the bin.

**ENERGY STAR** - Manitowoc Ice is an avid supporter of the EPA's voluntary Energy Star program. We believe in making energy star approved ice machines are not only good for the environment but it makes good business sense. In fact, we have more energy star models than any other ice machine manufacture. Moreover, Manitowoc Ice has been recognized by the Energy Star program as a Sustained Excellence Partner, winning "Partner of the Year" for 10 consecutive years. Look for the \* next to the price to indicate whether a model is Energy Star qualified, then check with your local dealer if it is rebate eligible.

**Best in Class** - Foodservice Equipment & Supplies (FE&S) magazine conducts an annual survey among its subscribing foodservice operators, dealers, and consultants asking them to evaluate ice machines in the categories of: quality, value, design, service and support, sales and support, inventory and availability. For 17 consecutive years Manitowoc Ice has been voted best in class. Don't take our word for it; take it from the people who know ice machines.

**Kitchen Innovation Award 2019** - Indigo NXT, was awarded the 2019 Kitchen Innovation Award from the National Restaurant Association. This prestigious award recognizes Indigo NXT for its innovation, efficiencies and productivity.

**Intelligent ice machine-** Manitowoc Indigo NXT with its easyTouch display is the only ice machine that offers a touch display providing the user and service agent with vital information to facilitate the set up and operation of the equipment. The display provides 4 main statuses: Making Ice, Bin Full, Machine Off or Program Mode. All the asset information can be obtained with one touch of an icon. Set up reminders to clean, change the air and water filters can be programmed easily into the machine. You can program the machine NOT to make ice when the store is closed or during the hours of the day of higher energy costs. The self diagnostic feature stores vital information for the service agent to access, so when they arrive, they have a good idea of the problem. This makes servicing easier, reduces labor costs and reduces machine down time.

**Easy to Clean-** Manitowoc Indigo Machines are the easiest ice machines in the industry to clean. All the component parts that require a deep cleaning can be removed without the use of tools. This includes the water trough as well as the water pump. Selected components contain Alpha San- Antimicrobial compound molded into the plastic to reduce slime build up.

**Energy Efficient-** Having the most Energy Star models is a result of advance technologies that allow the Indigo ice machine to work efficiently. Innovations like Air Assist which accelerates the ice harvest process and the Acoustical Ice Sensing probe allows for reliable operation in challenging water conditions. Air Assist and Acoustical Ice sensing are patent technologies only found on Manitowoc Indigo machines.

**LuminIce II Growth Inhibitor-** Manitowoc Indigo NXT and Neo machines offer the LuminIce II Growth Inhibitor device that runs quietly 24/7 keeping your ice machine cleaner longer. Less frequent cleanings saves labor, reduces cost and machine downtime. The device is particularly effective in environments where yeast is in the air (sandwich shops, bakeries, pizzerias, micro-breweries) because the LuminIce II device uses a UV bulb to create active air that inhibits the growth of bacteria and yeast spores inside the machine. The device is mounted inside the machine, and is integrated with the Easy Read Display to create a reminder when to service the bulb.

**Automatic Cleaning System – (iAUCS)** - Manitowoc Ice automatic cleaning system is a perfect complement to the LuminIce II growth inhibitor. Using the easyTouch display on the Indigo NXT Ice machine, program the time interval to either clean or sanitize the food zone automatically. No manual intervention is required. This is especially effective in areas of hard water, where periodic cleaning of the evaporator will keep the evaporator free of lime scale build up. (Note, iAUCS will not eliminate the need to do a deep cleaning periodically) but will keep your machine running at peak efficiency and cleaner longer).
